

Using PokerGrandmaster converter with Hand2Note

1. Download H2N beta version from <https://www.dropbox.com/s/nwtfls69jp6q83o/3.2.3.15.zip?dl=0>
Unzip the files and update your current H2N installation with them(copy and paste them to C:\Program Files\Hand2Note\). Make sure that your antivirus software is not deleting any files. After starting, H2N should report that the version is 3.2.3.15. **Do NOT update to 3.2.3.18!**

Hand2Note version 3.2.3.15
3.2.3.18 available!

2. Go to PokerGrandmaster General tab and:
 - a) Set hand history format to PokerMaster.
 - b) Copy the path of hand history export folder.
 - c) Do not enable “Hero alias”!
 - d) Enable option to use ¥ instead of \$.

3. Go to H2N Configuration/Auto Import and add hand history export folder.
4. Rename your emulator with your PokerMaster player id. This is required to make H2N work on seated tables. If you also want to use it on observed tables you need to add table id to the emulator name.

Connecting PokerGrandmaster virtual lobby to Hand2Note database

1. Start H2N. Connecting to H2N database is possible only when H2N is running.
2. Click on “Players List Settings” button in PokerGrandmaster Lobby tab.
3. Set all options except “Name” like on this picture:

Players List Settings

PostgreSQL 9.0 or higher is required!

Default port: HM2/PT4 - 5432, H2N - 5318

Enable

Database

Type: HM2 PT4 H2N

Host: localhost

Port: 5318

Username: postgres

Password: postgrespass

Name: new database

4. Go to H2N Configuration/Database to find out what is your database name and set it in the “Name” field.
