

Using PokerGrandmaster with Hand2Note

a) If you want to use H2N converter

1. Open H2N Configurator/HUD and make sure that “Disable rooms copatibility auto updates” option is **unchecked**. Restart H2N if the option was checked.

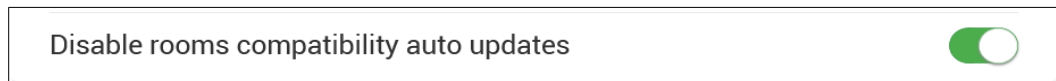

2. Open PGM General tab and make sure that “H2N Integration” for your site is **unchecked**.

b) If you want to disable H2N converter and use PGM converter (recommended for HHPoker)

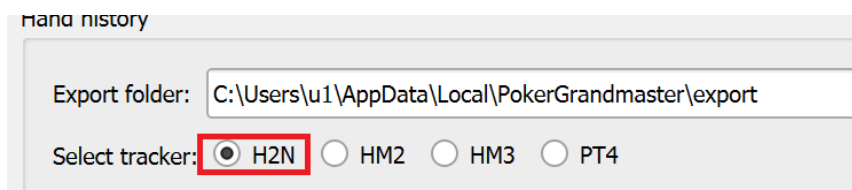

1. Open H2N Configurator/HUD and make sure that “Disable rooms copatibility auto updates” option is **checked**.

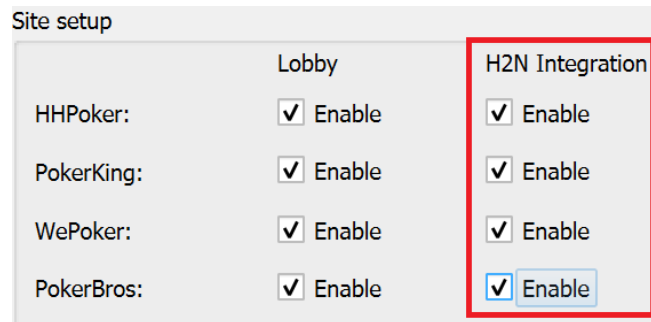

2. Close H2N, go to C:\Program Files\Hand2Note\integration folder and delete:

- for HHPoker: “h2nHost” application
- for PokerKing: “h2PokerKing” application
- for WePoker: “h2WePoker” application
- for PokerBros: “h2nPokerBros” application

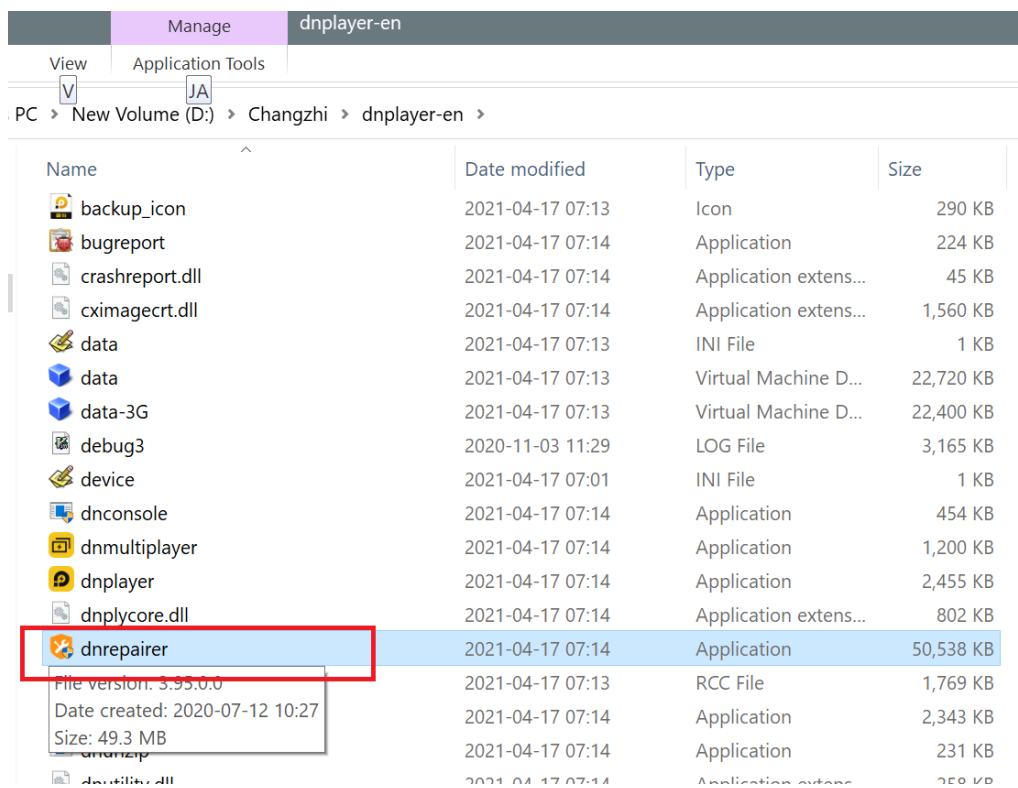

3. Open PGM General tab and select H2N as a tracker.

4. Make sure that “H2N Integration” for your site is **checked**.

5. (HHPoker only)Start all your emulators.
6. (HHPoker only)Repair your emulators by running “dnrepairer” application from D:\Changzhi\dnplayer-en folder. (dnrepairer will not show any windows and will perform it’s job in the background)

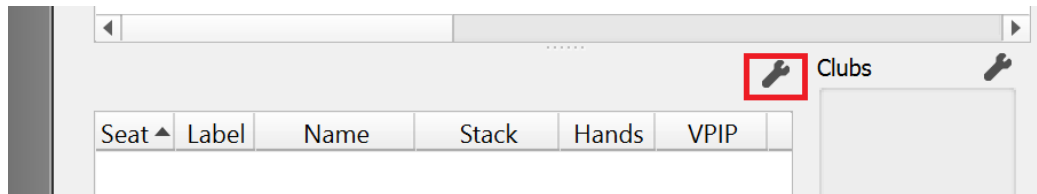

7. (HHPoker only)Restart all your emulators.

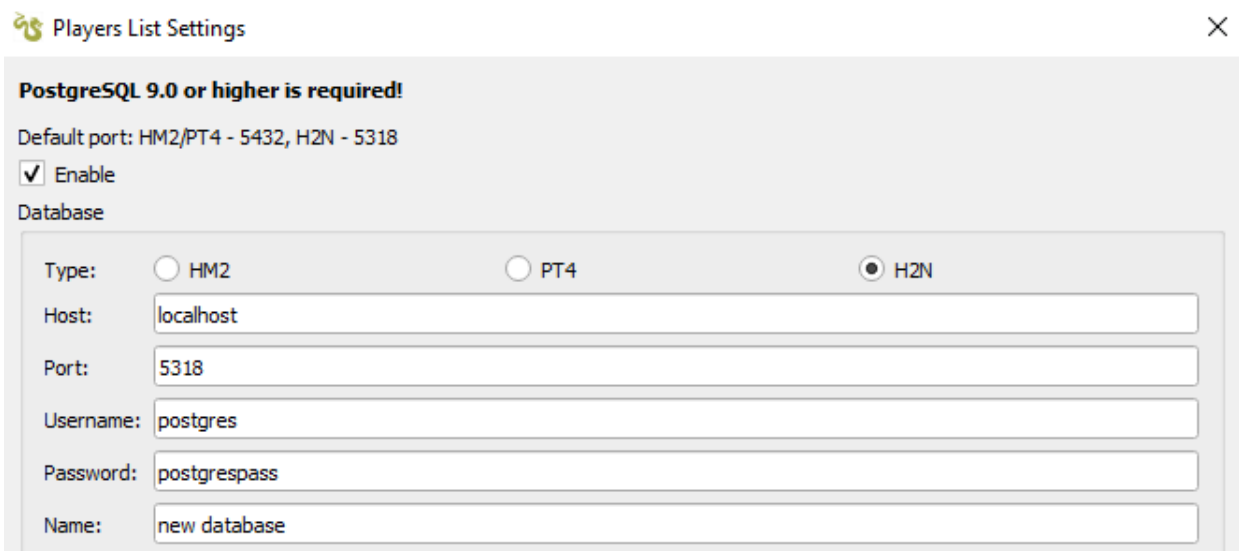

Connecting PGM Lobby to H2N database

You should ignore following steps if you don't have PGM Lobby subscription.

1. Start H2N. Connecting to H2N database is possible only when H2N is running.
2. Open "Players List Settings" by clicking on the wrench icon in PokerGrandmaster Lobby tab.

3. Set all options except "Name" like on this picture:

4. Go to H2N Configuration/Database to find out what is your database name and set it in the "Name" field.
